

# Product Feature:

# Power BI

## Powerful alone. Better together.

What if you could power up your reporting with a data visualisation tool that brings your organisation's social data from within Orlo, together with the rich data from across your tech stack? Well, you can! Orlo's integration for Microsoft Power BI helps your team collaborate on reports, create shareable dashboards and find meaningful insights - bridging the gap between data and decisions.

### Create custom visualisations

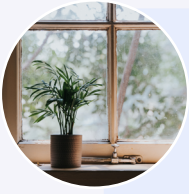

Orlo may have a vast reporting and analytics suite, but together with Power BI the possibilities are endless! Take your visualisations to the next level with multiple data sources, interactivity and customisation to empower your team to make data-driven decisions that get results.

### Build bespoke dashboards

With the building blocks in place, you can easily work together to deliver bespoke reporting dashboards that can be safely shared across your organisation. Keep a finger on the pulse with automatic updates thanks to Orlo's daily data refresh, so you never miss a beat.

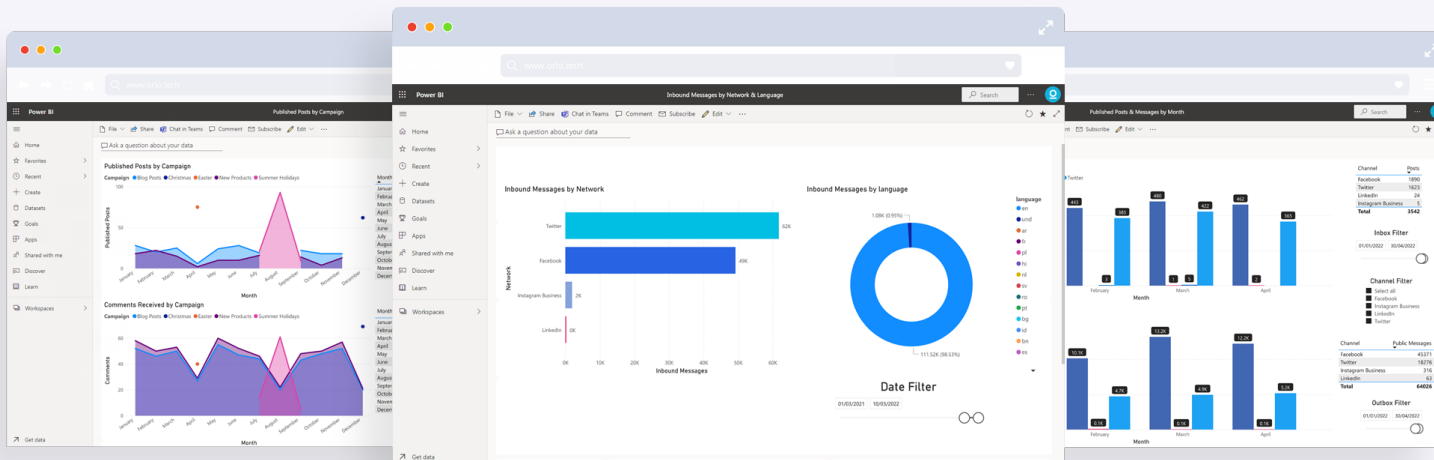

## Get a single pane of glass view

Bring your Orlo Inbox and Outbox data together with the other tools in your tech stack, to create a unified display. Uncover those all important business insights that are key to success with hundreds of data visualisations, built-in AI capabilities and an Excel integration to boot!

## Keep your data under wraps

Reduce the added cost, complexity and security risks of multiple solutions. Stay safe in the knowledge that your data is secure with industry-leading data security capabilities including sensitivity labelling, end-to-end encryption, and real-time access monitoring.
